

i am a photoshop hw

For this homework you will be applying what you have learned from the class videos about Photoshop and the CRAP principles. You will make an album cover for *your* favorite or least favorite or indifferent to band using the pictures located on the class resources page for this homework. Remix the photos!

1. Go to the class “Resources” page and look at the visual images you can use to complete this project (i am a photoshop hw images). Download the visual images you’d like to use. You have to use at least **five** of the images. You have to use the “Skull.” **ONLY USE THESE IMAGES!**
2. Use creative cropping, layers, and the tools you’ve learned in the tutorials to add something to the eye of the skull (for example, you could add a flower or frog-it’s up to you).
3. Use one of the visual images as your background layer, which you place the skull on.
4. Make a drop-shadow on a layer.
5. Use a stroke on layer.
6. Puppet warp a layer.
7. Use the shape tool somehow.
8. Clone something.
9. Use the brush somehow and use a filter on at least one layer.
10. Find two photoshop tutorials online that teach you something new and use them in your album cover.
11. Use the text tool to add this title information
Title Information:
band=your fav.
Title of Album=up to you. (I mean this isn’t the title. You get to choose what you want to call it.)
12. Save the completed visual image as a **png**. Final size of album cover should be 500px=width and 500px=height
13. Email me the album cover and tell me in a list where you performed steps 4->9 like this:
4—I used a drop shadow on the layer text for the title.
5—I used a stroke on the image of the skull.

Make it look good!

Due: Tuesday (2/14) by 11:59pm. Email me the album cover and your list of what you did.
